	<ul> <li>advertising.</li> <li>Display ads have increased to 33.9% of revenue in 2009 from 30.8% in 2006 – meaning display ads have decreased by a smaller percent than overall advertising.</li> <li>Inserts represent more of our large retail establishments where across the board decisions are made at a national headquarters. We have minimal impact on their decision making. Therefore a larger decrease.</li> <li>Display ads represent more of our smaller local businesses where our local economy and our sales reps have more of an impact on advertising decisions. Therefore a smaller decrease. Our local advertising market has held up reasonably well. It is large national businesses that have had the most negative impact on our advertising – display ad and inserts. We have remained profitable throughout this entire period, but at a much smaller profit percentage. 2010 is showing improvement.</li> </ul>
